

### **Winter Storm Gia - Roofing Source for Snow Removal**

Winter Storm Gia approaches the Washington, D.C. Metropolitan area with estimated snow totals ranging from 2-6". Excess snow loads and drainage backups can wreak havoc on your commercial systems, causing overloading, higher levels of damage and leakage.

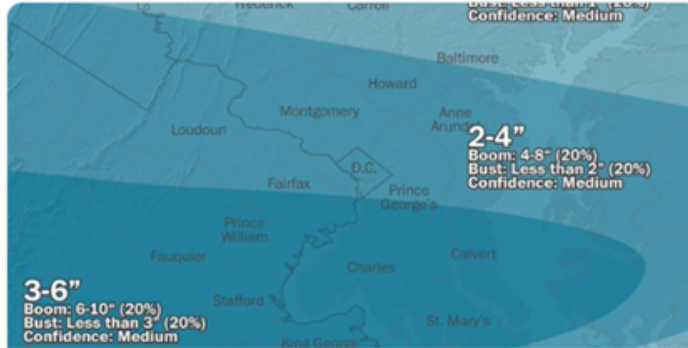

Simpson Unlimited, your commercial exterior restoration company, is prepared to offer emergency snow removal services across the Virginia, Maryland, and DC area. In past years, we have performed emergency rooftop snow removal for many owners and property managers across the region.

Should the snow storm require snow removal next week, Simpson will be available to remove snow as soon as conditions are safe for our employees, *even if our office is closed*. To request snow removal service next week, please call our 24/7 emergency line at 703-361-0841 and select option 1, or email [simpson@simpsonunlimited.com](mailto:simpson@simpsonunlimited.com) to request service and one of our management team members will reach out to you directly.
